

# ORION

Technical Specifications

S	A 21 cm, H 28cm
L	A 35 cm, H 48cm

## DESCRIPTION

ORION Ceramic Pendant Light emits a warm, focused glow, making it especially suitable for placement above a dining table or kitchen island. The sparkling light that filters through the pleated surface gives the room a distinctive character and a sense of warmth and comfort.

Thanks to its simple shape, enriched with subtle details, the lamp fits perfectly in both modern, minimalist interiors and more traditional settings. It pairs beautifully with wood, clay plasters, and other natural materials.

Crafted using 3D printing technology, the lamp features a complex, pleated surface that gradually opens towards the bottom, enhancing the amount of light it casts into the space.
